

RECYCLING

*make something new from something that has
been used before*

COMPARED ANALYSIS OF OUR COUNTRIES

Topic	<u>Germany</u>	<u>Italy</u>	<u>Lithuania</u>	<u>Poland</u>
Disposal of rubbish (at school/ at home)	<p>Home: Paper in the blue bin, glass in a container, plastic in the grey bin, organic waste in the brown bin</p> <p>School: Everything in one bin, I think the school is sorting then</p>	<p>At home:paper in the grey and yellow bin, glass in the green bin, plastic in blue containers, cans, organic waste and in non-recycle litter in the black container</p> <p>At school:plastic, paper, cans and non-recycle litter bins</p>	<p>Home: Paper and plastic in blue bin, glass in a green bin, organic waste in the brown bin.</p> <p>School: Plastic - yellow bin, paper - blue bin and glass - green bin.</p>	<p>At our school: there are separate trash bins intended to recycle glass, PET and paper-based litters.</p> <p>At home: people segregate rubbish throwing them into separate bags or bins.</p>
The cost of waste disposal by students at school	<p>There are no costs for students.</p>	<p>We don't pay anything at school.</p>	<p>We don't have to pay anything at school.</p>	<p>We don't pay anything. :l</p>

Ways to reduce waste	Use everything more often and donate everything you don't want to have anymore	use paper sheets more than one time, we shouldn't waste food.	Compost food scraps and yard waste. Buy products with little packaging and of course use paper sheets more than one time.	We should set rubbish together and buy things which we need the most and use up.
Recycling at your school	No recycling from the school	We recycle toner and plastic.	We recycle plastic	We don't recycle.

<p>upcycling (provide examples)</p>	<p>Upcycling means making anything great out of rubbish. You can for example upcycle an old pant when you are sewing other scrap of cloth in it</p>	<p>Upcycling means that rubbish become a new object, thanks to creativity. For example old boxes can be decorated and they became new nice objects or old boards become shelves.</p>	<p>Upcycling is the process of converting old materials into something useful. For example: Reuse toilet paper rolls to organize cables and chords</p>	<p>Upcycling is the process of transforming useless materials or product into products/materials for better usage. For example: damaged paper can be re-processed into newspaper or carton</p>
<p>Recycle and upcycle some rubbish, don't put everything in one bin!</p>	<p>Don't put everything in the rubbish bin. You can simply make it great again.</p>	<p>upcycle something in this school like old chair or desks.</p>	<p>Recycle and upcycle some rubbish, don't put everything in one bin!</p>	<p>We should not throw away everything to the container. Rather than it we should use them multiple times.</p>

Cost of waste disposal per student at school

**There are no costs for students,
nobody needs to pay anything!**

Ways to reduce waste

- Use everything more often and donate everything you don't want to have anymore
- Compost food scraps and yard waste. Buy products with little packaging and of course use paper sheets more than one time.
- Set rubbish together and buy things which we need the most and use up.

Recycling in your schools

create a bar chart showing information

UPCYCLING

- getting out of rubbish new or better products
- opposite of downcycling (getting new material with lesser quality)
- Upcycling can be found in the art, the music and the industry
- examples the way from the tire to the sole of flip-flops, or couches out of oil barrels

Possible developments, in our future we wish

Create:

- robots that will collect every rubbish,
- machine that will segregate them all,
- intelligent bins that will accept only specific type of rubbish,
- intelligent bins that will reduce rubbish's content
