

## Main topics in the videos

### 1st video:

The main topic of this lecture is our mindset and outlook on disabled people. The main problem with it is that people firstly see a person's disability and not their personality, we don't treat people with disabilities equally.

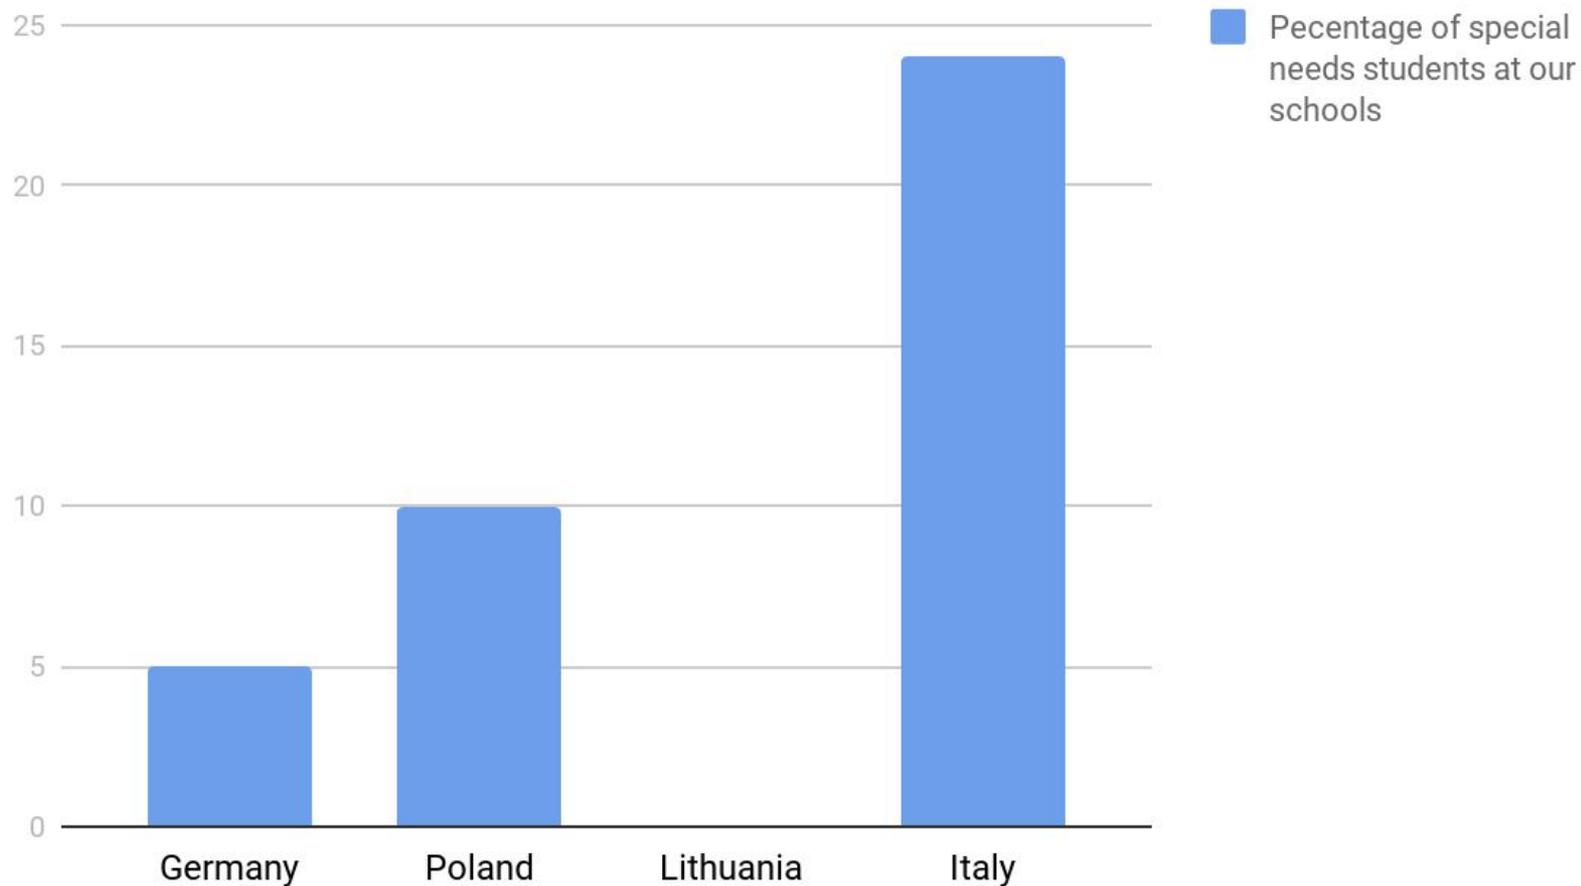

### 2nd video:

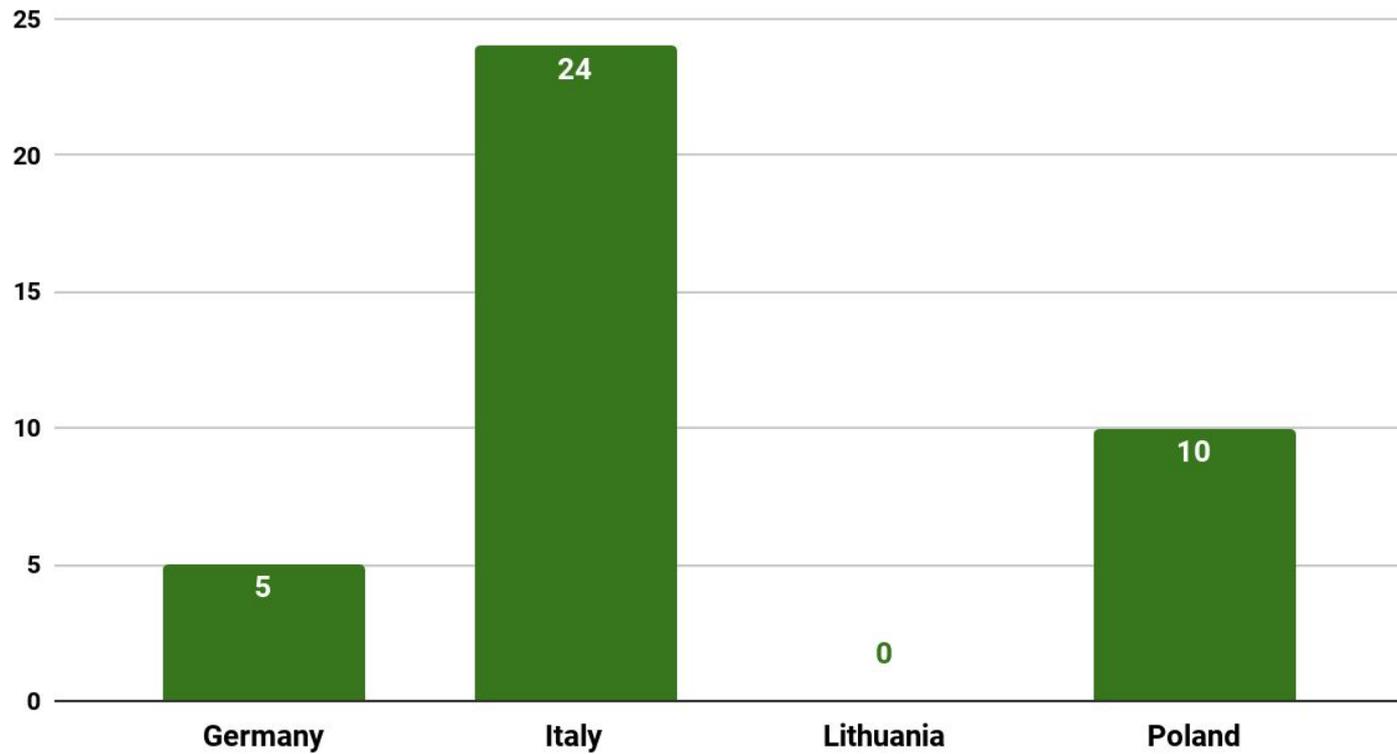

The main topics of this video are cultural diversity and integration in schools. Cultural diversity is not always the main factor in better school. Integration and non existent racial division leads school's students to better opportunities and chances.

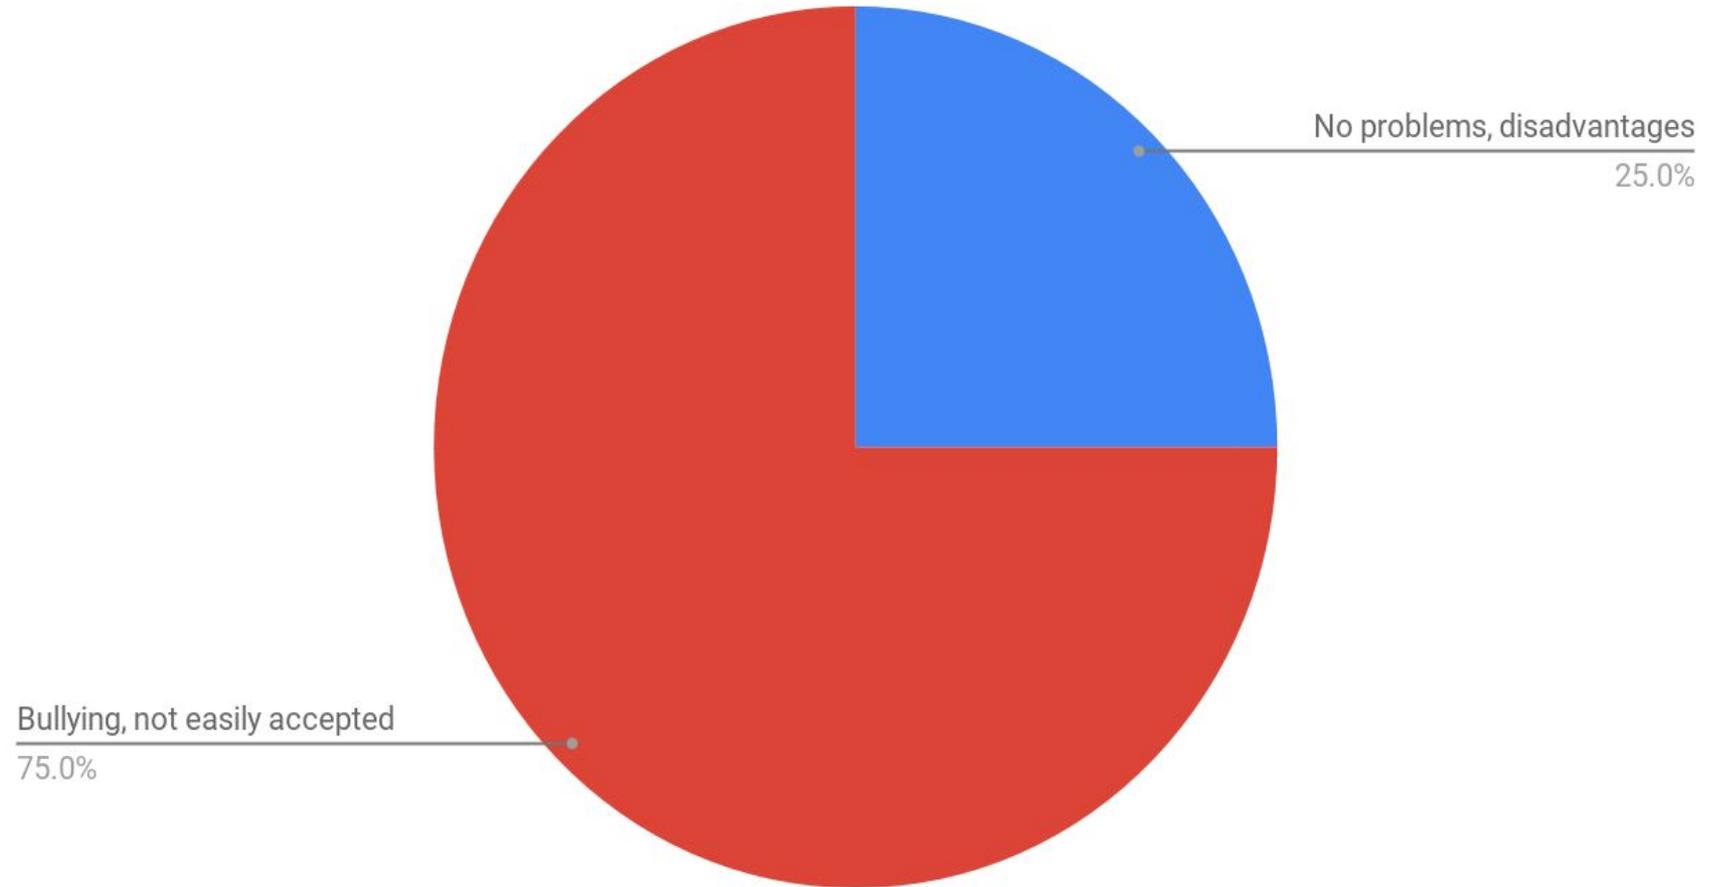

## How many special needs students are at our schools?

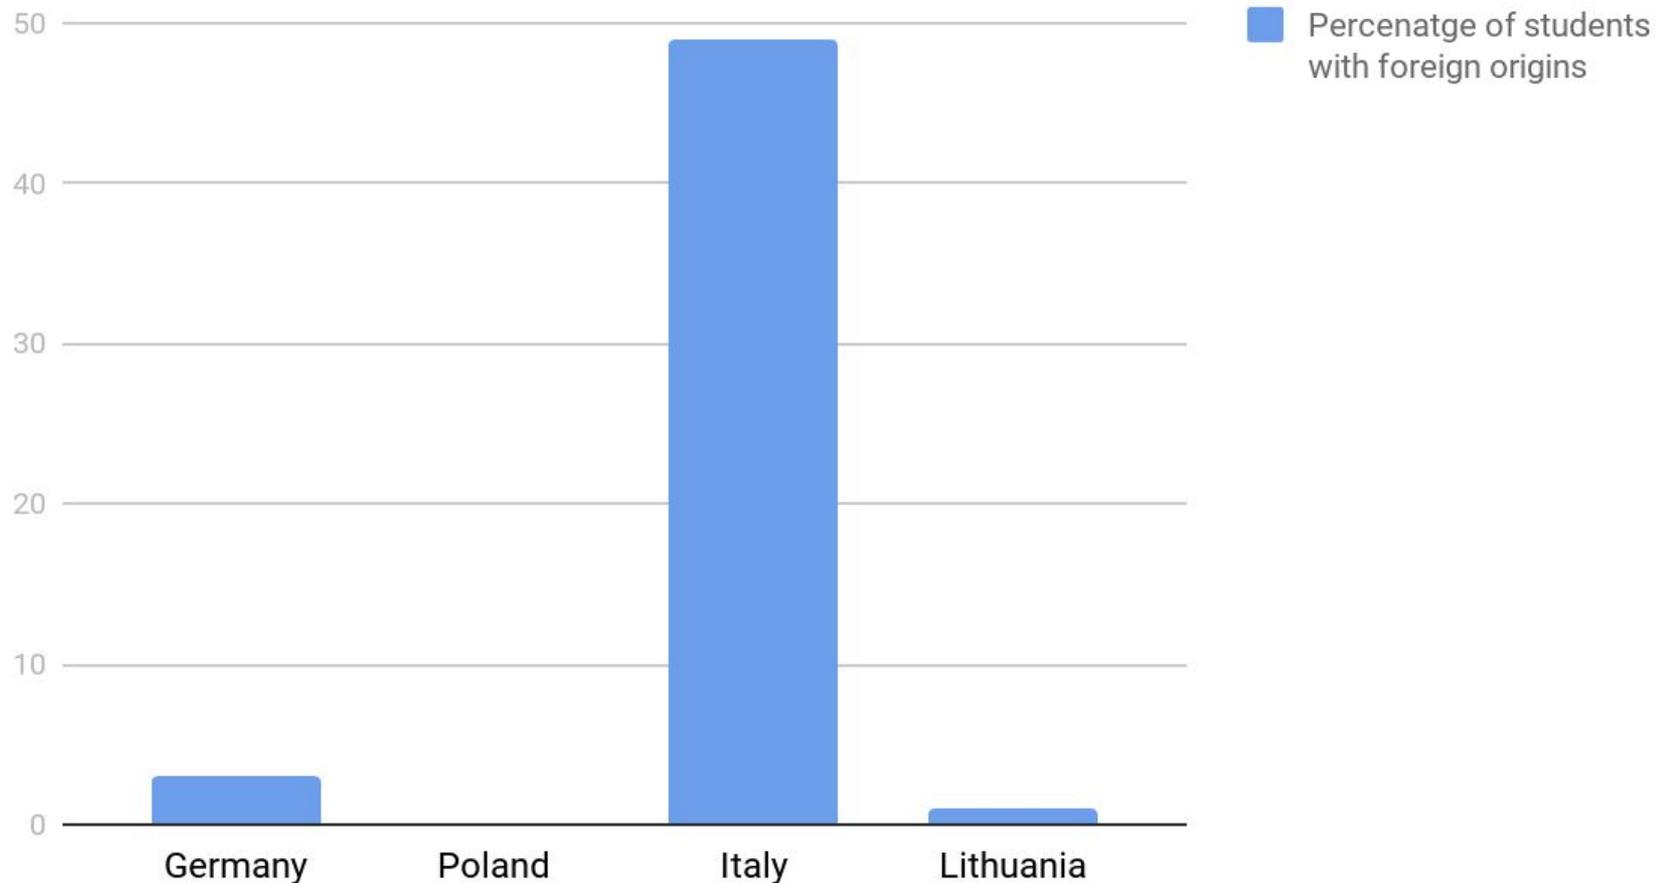

## Percentage of special needs students

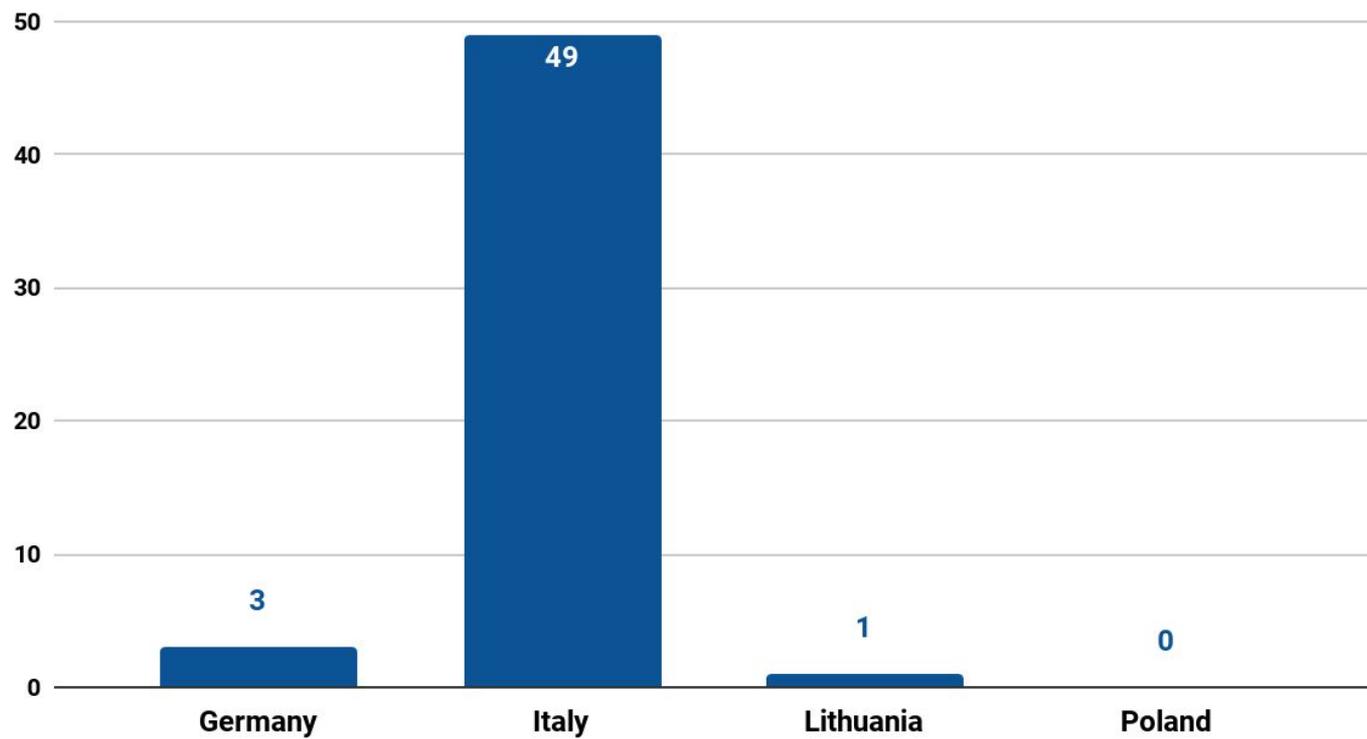

# Are there problems concerning acceptance or bullying of special students?

## How many students with foreign origins are there?

## Percentage of foreign students

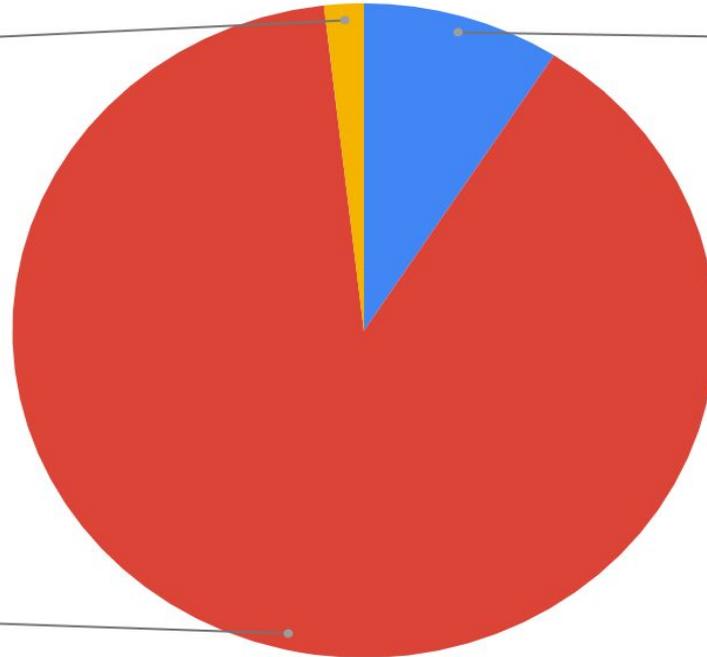

## Where do the foreign students come from?

Lithuania: Russia  
1.8%

Germany: Syria, Pakistan  
9.1%

Italy: Africa, Balcans,  
89.1%

## MAIN PROBLEM THEY HAVE TO FACE

The 49% of our students is composed by foreign students. The majority come from: Africa and Balkan Europe. One of the main problems concerning school is about a difficult ability of understanding and facing the school programme. Sometimes happens that they are bullied by other students.

There are other problems concerning integration in our school for example lingual and cultural barriers, preconceptions from schoolmates and teachers, which often cause frustration in them.

## ADVANTAGES OF MULTICULTURALISM

We think that living in a multicultural society is very useful in order to make realistic the possibility of a more no-racist world where a lot of cultures are mixed in a whole cosmopolitan society.

# Disadvantages of multiculturalism

We think that disadvantages of multiculturalism may be:

- connected with other cultures and lifestyle,
- problems with languages and communication,
- feeling overwhelmed by foreign people,
- being offended by certain things the people here are used to.

## Overall comments

There are special needs and foreign students in most schools. They have their struggles but other students are mostly accepting and understanding.

Multiculturalism has its disadvantages but usually they are outweighed by advantages such as acknowledging and learning from different cultures and lifestyles.

Thank you for your attention!
